**This is a resource intended for Vocaloid users who wish to import V2 voicebanks into V3 and/or V4, but are for any reason, unable to get import codes from the publishing company. These codes, unlike activation codes, only enable an already activated voicebank to be imported into the V3/V4 editor. Once again, these are NOT ACTIVATION CODES, only IMPORT CODES. Thanks you to all the fans who contributed and continue to share this list and a love for Voice synthesizers~ - @Chickadee_39 on Twitter*
